Built for life. Yours.

**AIREASE**

### Delivering consistent comfort and peace of mind

Since 1928, we've been providing homeowners with reliable, well-built heating and cooling products that make life easier and more comfortable. Thoughtfully designed, our AirEase® line of gas furnaces offers an impressive array of technology that makes them extremely quiet, dependable and energy efficient. So you can enjoy peace, quiet and comfort every day of every year.

### HVAC experts you can trust

Your comfort is our priority. Your AirEase Dealer will take the time to understand your comfort needs. They know you want the best performance, value and dependability from your heating system, and they have the products and expertise to satisfy these demands. That means you can rely on your AirEase Dealer to help you to find exactly the right comfort solution for your home and your lifestyle.

## Your environment. Your way.

Choosing the right heating and cooling system for your home environment is a big decision. Your AirEase Dealer can help you create the right system for your home comfort needs. To help you make the best and smartest system choice, here are a few things to consider:

### EFFICIENCY

It's pretty simple. A high-efficiency system helps lower your monthly utility bills. Efficiency is measured in AFUE (Annual Fuel Utilization Efficiency)—the higher this number, the greater the efficiency. Replacing an older unit with an 80% AFUE unit can increase performance and start saving you money.

### RELIABILITY

You can always count on your AirEase unit. Innovations such as our EHX™ Technology and unique burner design work together to deliver premium performance and even heat exchange, which will extend the life of your furnace.

### AIR QUALITY

Where you live matters. Your family's sensitivity to a host of natural and man-made allergens means enhanced air quality is all the more critical in your home. And don't forget humidity levels when you're considering the ideal system for year-round comfort.

### PEACE OF MIND

More control over your comfort—that's our commitment to you. You can see it in our craftsmanship and innovation—like our proprietary Comfort Sync™ controls, which allow you to easily monitor your unit's performance and enjoy maximum comfort in your home.

### NOISE REDUCTION

Comfort and performance also include quiet operation of your system. Enjoy quieter start-up and operation with our Quiet Combustion™ Technology.

## Furnace System Basics

The most common type of system pairs an interior gas furnace with an exterior air conditioner. Furnaces can also be paired with a heat pump, which is then called a dual-fuel system. Matching your furnace with a compatible AirEase® air conditioner or heat pump will generate optimum efficiency and ideal system performance.

### How motor stages affect temperature control

**Fixed Speed (PSC):** A reliable, single-speed, direct-drive motor provides a consistent airflow to maintain even temperature ranges.

**Constant Torque:** The single-speed blower maintains a more consistent airflow operating with greater efficiency.

**Variable Speed:** The blower constantly adjusts airflow and humidity levels, which creates more even temperatures throughout your home, while also being the most energy efficient.

## How It Works

1. When it gets cold inside your home, your thermostat automatically activates your gas furnace to compensate.
2. The burners ignite the gas and create warm air in the heat exchanger.
3. The blower turns on and forces the warm air throughout your home via ducts.
4. Warm air is circulated throughout your home until the desired temperature is achieved.

# Technology designed with your comfort in mind.

Inside every AirEase® gas furnace, you'll find a high level of technology and craftsmanship, backed by a Lifetime Limited Warranty on the heat exchanger.\*

Model shown **A802V**

## **EHX™ Technology:**

Every AirEase furnace is engineered and built with EHX Technology, a patented design that eliminates the hot spots that can shorten furnace life. EHX Technology makes heat exchangers more durable, and with its advanced airflow system, more air contacts the heat exchanger surface area for greater heat transfer into the home, enhancing efficiency and comfort.

## **Noise Reduction:**

Insulated cabinet prevents loss of warm air while reducing noise from the motor.

## **Quiet Combustion™ Technology:**

Uses a lower Btu input per burner for quieter start-up and operation.

## **Internal Monitoring:**

Your AirEase furnace's electronic control system prolongs system life by continuously monitoring internal components for optimum performance and fault prevention.

## **Comfort Sync™ Control Panel:**

The A802V continuously monitors internal components for optimum performance and fault prevention. When combined with the Comfort Sync™ thermostat, the Comfort Sync-enabled control panel provides peace of mind through enhanced diagnostics, fault prevention and communication of equipment performance to you and your HVAC professional.

The combination of a gas furnace and an electric heat pump pairs two energy sources for the perfect balance of energy efficiency and comfort.

# Reliable single-stage furnaces deliver year-after-year performance.

## A801A

### Quality craftsmanship and exceptional value

A single-speed, direct-drive motor provides a consistent flow of warm air to maintain even temperatures throughout your home. An electronic control system enhances comfort by controlling furnace functions with the highest degree of digital accuracy.

## A801E

### Precise performance and increased efficiency

The constant torque motor maintains a more consistent airflow than a single-speed PSC motor and helps eliminate hot or cold spots for more even temperatures throughout your home. When you set your thermostat to "Fan On," the furnace circulates air at low speed, which uses less energy and improves air filtration. The motor also operates with greater efficiency and less noise.

## A802V

**Quality and dependability with premium features**

Longer, gentler heat cycles run at low capacity during mild weather to save money and provide maximum control. It automatically switches to full capacity to keep you warm on colder days. A variable-speed blower modifies airspeed to create a more comfortable environment without hot or cold spots and automatically provides dehumidification to enhance comfort levels. Pair the A802V with a Pro Series™ outdoor unit and the Comfort Sync™ thermostat for maximum control.

AirEase Pro Series furnaces are Comfort Sync thermostat enabled for maximum control. Using a smartphone app, the Comfort Sync thermostat puts advanced temperature monitoring and adjustment right in your hands, no matter where you may be. For added peace of mind, when Comfort Sync detects that repairs and regular maintenance are needed, it alerts you or your dealer instantly via email. The Comfort Sync thermostat also offers remote access via smartphone, tablet or laptop to provide greater control.
