

# Air Conditioners

13.0 to 20.0 SEER  
Single Stage, Two Stage  
and Variable Capacity

A HOME ENVIRONMENT THAT'S EVERYTHING YOU WANT IT TO BE.

# BUILT FOR LIFE. YOURS.

**AIREASE**<sup>®</sup>

Built for life. Yours.

## Delivering consistent comfort and peace of mind

Since 1928, we've been providing homeowners with reliable, well-built heating and cooling products that make life easier and more comfortable. Thoughtfully designed, our AirEase® line of air conditioners offers an impressive array of technology that makes them extremely quiet, dependable and energy efficient. So you can enjoy peace and comfort every day of every year.

## HVAC experts you can trust

Your comfort is our priority. AirEase Dealers take the time to understand your comfort needs. They know you want the best performance, value and dependability from your cooling system, and they have the products and expertise to satisfy these demands. That means you can rely on your AirEase Dealer to help you to find exactly the right comfort solution for your home and your lifestyle.

## Helping create your environment, your way.

Choosing the right cooling system for your home environment is a big decision. Your AirEase Dealer can help you create the right system for your home comfort needs. To help you make the best and smartest system choice, here are a few things to consider:

### EFFICIENCY

It's pretty simple. A high-efficiency system helps lower your monthly utility bills. Efficiency is measured in SEER (Seasonal Energy Efficiency Ratio) and the higher the number, the greater the efficiency. Replacing an older unit with a 14 SEER or higher unit can increase performance and start saving you money immediately.

### RELIABILITY

You can always count on your AirEase unit. Technology developments such as MHT™ and Omniguard™, plus other advanced-design features, work together to deliver premium performance and extend the life of your air conditioner.

### AIR QUALITY

Where you live matters. Your family's sensitivity to a host of natural and man-made allergens means enhanced air quality is all the more critical in your home. And don't forget humidity levels when you're considering the ideal system for year-round comfort.

### PEACE OF MIND

More control over your comfort—that's our commitment to you. You can see it in our craftsmanship and technology—like our proprietary Comfort Sync™ controls, which allow you to easily monitor your unit's performance and enjoy maximum comfort in your home.

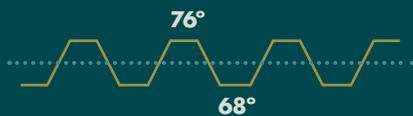

### NOISE REDUCTION

Comfort and performance also include quiet operation of your system. Enjoy reduced operating noise with select models featuring a high-quality sound blanket for noise reduction.

## Air Conditioning System Basics

The most common type of system pairs an exterior air conditioner with an interior air handler or furnace, which work in tandem to circulate air throughout your home. Matching your air conditioner with a compatible AirEase® air handler or furnace will generate optimum efficiency and ideal system performance.

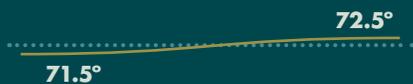

### How compressor stages affect performance

**Single stage** means heating and cooling are either all the way on or all the way off, creating temperature swings.

**Two stage** runs at low or high operating speeds, depending on conditions, creating more even, consistent temperatures.

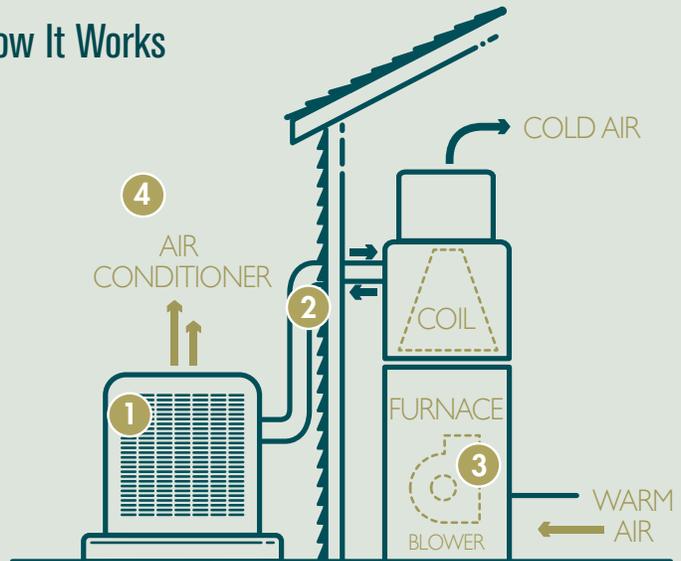

**Variable capacity** gradually ramps up and down to keep the temperature exactly where you want it, using even less power.

## Corrosion Protection

Select AirEase Air Conditioner units feature Omniguard™ Total Corrosion Protection Technology, offering improved corrosion protection compared to traditional coils and preserving the life of your system for years to come.

## How It Works

1. When it gets warm inside your home, your thermostat automatically activates your air conditioner to compensate.
2. The air conditioner on the outside of your home circulates refrigerant that absorbs heat from the indoor environment through the coil as it travels between the indoor coil and the air conditioner outside.
3. As refrigerant flows through the evaporator coil, a blower in the furnace moves the warm air across the coil surface, removing heat and dispensing the cooled air through your home's ductwork.
4. The captured heat is then sent back to the air conditioner outside to be released into the outside air, cooling your home comfortably and efficiently.

# Technology designed with your comfort in mind.

Inside every AirEase® air conditioner, you'll find a high level of technology and craftsmanship, backed by a 10-year Limited Warranty on the compressor\* and a 10-year Limited Warranty on parts\*.

Model shown **4SCU20LX**

## MHT™ Technology

AirEase's proprietary heat transfer system uses a specially designed fan shroud, rifled tubing and lanced coil fins for maximum heat transfer and efficiency.

## Noise Reduction

A swept-wing fan blade design reduces turbulence, while a heavy-duty compressor blanket further reduces sound levels.

## Integrated Compressor Protection

High- and low-pressure switches protect the compressor, helping to ensure lasting performance.

## Comfort Sync™ Control Panel

All Pro Series™ units continuously monitor internal components for optimum performance and fault prevention, and notify you and your dealer if repairs or maintenance are needed.

## Inverter-Driven Scroll Compressor

Rather than running at one or even two speeds, the scroll compressor uses an inverter motor that can change its speed in small, precise increments, saving more energy while holding your temperature precisely where you set it.

## Sealed Contactor with Lugs

Completely covers the contactor, protecting it from debris and insects.

\*Product registration required. Warranty applies to residential applications only. For terms, conditions and exclusions, see full warranty at [airease.com](http://airease.com).

# When it's warm, you'll be perfectly comfortable with these reliable single-stage air conditioners.

## 4SCU13LE & 4SCU13LB

### Proven technology & exceptional value

With SEER ratings up to 14.00, these air conditioners deliver consistent efficiency and performance through the hottest of summers.

*Only available in the Northern U.S. and Canada per Federal Government regulations.*

## 4SCU16LE & 4SCU14LB

### A commitment to exceeding expectations

Delivering up to 16 SEER, the 4SCU16LE and 4SCU14LB are the perfect blend of higher efficiency, quality and quieter operation. Thoughtfully designed, these units may qualify for local utility rebates\* and reduce energy bills, while providing a comfortable home environment. In addition, Omniguard™ Total Corrosion Protection Technology offers enhanced corrosion protection, lowering overall maintenance costs.

# Pro Series™ air conditioners offer ultimate control with up to twice the energy savings of older units.

## 4SCU16LS

**A powerful combination of performance & efficiency**

Offering 16 SEER efficiency, the 4SCU16LS saves you money every month, and may qualify for local utility rebates.\* Because it operates at two different speeds, this air conditioner provides enhanced performance with improved control over temperature and humidity for healthier air throughout your home. Plus, the 4SCU16LS constantly monitors itself for optimum performance and complete peace of mind.

## 4SCU20LX

**Extreme precision & maximum control**

The 4SCU20LX true variable-capacity air conditioner helps keep your home's temperature precisely where you want it and may qualify for local utility rebates.\* Rather than running at one or even two speeds, the inverter-driven scroll compressor changes speed in small increments for exact temperatures. Plus, Comfort Sync™ zoning delivers precise temperatures from room to room for complete home temperature control.

Proper sizing and installation of equipment is critical to achieve optimal performance. Split system air conditioners and heat pumps must be matched with appropriate coil components to meet ENERGY STAR criteria. Ask your contractor for details or visit [www.energystar.gov](http://www.energystar.gov).
