

Inside the design of an AirEase 4SCU18LT air conditioner:

Microban® Protection:

On Matched AirEase Indoor Coil. Drain pans are infused with an antibacterial agent that destabilizes the membrane of microorganism cells, disrupting the cellular function of odor-causing mold and bacteria so they can no longer grow or reproduce.

MHT™ Technology:

AirEase's proprietary heat transfer system. A specially designed fan shroud pulls air evenly throughout the air conditioner's coil surface. The coil features rifled tubing to enhance refrigerant flow, while lanced coil fins increase surface contact between metal and air. All combine for maximum heat transfer and efficiency

Comfort Alert Diagnostics:

Your AirEase **4SCU18LT** air conditioner's electronic control system prolongs system life by continuously monitoring internal components for optimum performance and fault prevention.

Sound Reduction:

High-tech, swept-wing, fan blade design allows for better sound control and is engineered for longlasting durability. A heavy-duty compressor blanket further reduces sound levels.

Two-Stage Scroll Compressor:

Rather than being "all on" or "all off," your air conditioner can adjust its cooling output based on conditions inside and outside your home. During mild weather, it runs at low capacity saving energy, and removing more humidity from your air.

Integrated Compressor Protection:

High- and low-pressure switches give additional reliability to each AirEase cooling unit. The high-pressure switch prevents operation if refrigerant pressures exceed safe levels, protecting the compressor. If your unit does not have enough refrigerant, the low-pressure switch prevents the unit from drawing in moisture and other contaminants while operating.

The advanced features of the AirEase **4SCU18LT** work together to bring you:

CRAFTSMANSHIP

AirEase uses quality materials and careful attention to detail in every air conditioner we build. Features like MHT Technology and an electronic control system demonstrate our commitment to offering you more.

EFFICIENCY

With its two-stage scroll compressor, the **45CU18LT** can offer a Seasonal Energy Efficiency Ratio (SEER) of up to 18.00. This can potentially **save** you hundreds of dollars per year on your utility bills. (See back cover for an estimate of annual energy savings.)

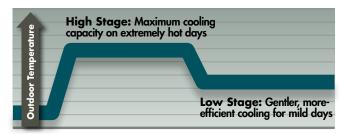

COMMITMENT

Our commitment to a better product is backed by a 10-Year Limited Warranty on the compressor and a 10-Year Limited Warranty on parts.* The **4SCU18LT** is engineered for efficiency and built with pride. It's everything you're expecting and more.

PRECISE PERFORMANCE

Two-stage cooling maintains consistent temperature throughout your home. Longer, gentler cooling cycles at low capacity not only help you stay efficient, but also help control humidity levels. And when cooling demand increases, your 4SCU18LT can ramp up to its higher speed to keep your home just the right temperature.

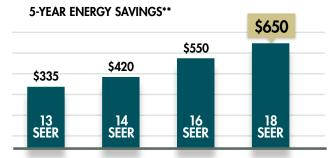

TWO-STAGE COMPRESSOR OPERATION

With its two-stage design, the 4SCU18LT makes the distinction between mild and extremely hot days, using only the energy necessary to keep you comfortable.

EFFICIENCY

The 4SCU18LT has a SEER of 18, which is higher than you'll find with conventional single-speed air conditioners. So you can stay cool and comfortable all summer long while using less energy.

Savings versus 10.00 SEER units

- *Warranty applies to residential applications only. For terms, conditions and exclusions, see full warranty at alliedair.com.
- **Savings vary depending on use, geography, lifestyle, maintenance, installation and other factors.

The AirEase[™] **4SCU18LT** combines smart thinking, quality materials and the flexibility of two-stage cooling to bring more comfort into your life.

Whether you're in the middle of a mild spring day or a blistering summer heat wave, the AirEase **4SCU18LT** will make sure you're at the perfect temperature. It will also keep you from using more energy than you need to. It's built to deliver more every day, **because it's BUILT FOR LIFE. YOURS.**
