

4SHP18LS

Up to 18 SEER,
Two-Stage
Heat Pumps

SUPER-EFFICIENT COOLING PREFERRED BY PROFESSIONALS WHO DEMAND MORE.

THE PROFESSIONAL'S CHOICE

 **ARMSTRONG**
AIR
The Professional's Choice

Professionals work hard to deliver solid results. And they choose products that do the same.

Advanced features and technology mixed with long-term dependability. When you choose the Armstrong Air® 4SHPI8LS heat pump, you can take comfort knowing this powerful combination is at work to give you the **highest levels of efficiency, reliability and cooling performance.** It keeps your home consistently cool—day after day and season after season, building on more than 80 years of expertise. That's why we're the brand chosen by HVAC professionals across the country.

Inside the design of an Armstrong Air 4SHP18LS heat pump:

MHT™ Technology:

Armstrong Air's proprietary heat transfer system. A specially designed fan shroud pulls air evenly throughout the heat pump's coil surface. The coil features rifled tubing to enhance refrigerant flow, while lanced coil fins increase surface contact between metal and air. All combine for maximum heat transfer and efficiency.

Quiet Shift™ Technology:

Allows heat pumps to enter defrost mode without excessive noise. Since refrigerant pressure is allowed to equalize before the switch, the heat pump can dissipate performance-robbing frost and ice quietly.

Sound Reduction:

High-tech, swept-wing, fan blade design allows for better sound control and is engineered for long-lasting durability. A heavy-duty compressor blanket further reduces sound levels.

Two-Stage Scroll Compressor:

Rather than being "all on" or "all off," your heat pump can adjust its output to a high or low level based on your cooling needs. Its two-stage scroll compressor uses a time-tested design known for its consistent performance and long operating life.

Integrated Compressor Protection:

High- and low-pressure switches give additional reliability to each Armstrong Air heat pump. The high-pressure switch prevents operation if refrigerant pressures exceed safe levels, protecting the compressor. If your unit does not have enough refrigerant, the low-pressure switch prevents the unit from drawing in moisture and other contaminants while operating.

Sealed Contactor with Lugs:

Completely covers the contactor, protecting it from debris and insects.

Communicating Control Board:

Your Armstrong Air 4SHP18LS can continuously monitor internal components for optimum performance and fault prevention. When paired with the Comfort Sync® thermostat, you and your dealer can automatically be notified if repairs or maintenance are needed.

The advanced features of the Armstrong Air 4SHP18LS work together to bring you:

CRAFTSMANSHIP

The 4SHP18LS combines advanced MHT and Quiet Shift Technologies with the highest-quality materials to **deliver superior performance** that you can rely on for many years to come.

EFFICIENCY

With efficiency ratings of up to 18.00 SEER* and 9.20 HSPF*, the 4SHP18LS heat pump has the power to **reduce your utility bills by hundreds of dollars every year.** (See back cover for an estimate of annual energy savings.)

COMMITMENT

Armstrong Air's dedication to a better product is backed by a 10-Year Limited Warranty on the compressor and a 10-Year Limited Warranty on parts.**

The combination of a gas furnace and an electric heat pump pairs two energy sources for the perfect balance of energy efficiency and comfort.

Designed to meet the demanding standards of homeowners and professionals alike.

PRECISE PERFORMANCE

Two-stage operation maintains a consistent temperature throughout your home. Since the **4SHPI8LS** can run at a lower capacity during milder weather, it can use longer, gentler, more-efficient heating and cooling cycles. During extremely hot or cold weather, though, it can ramp up to a higher capacity to keep your home just the right temperature.

The **4SHPI8LS** is also designed to be dual-fuel compatible, meaning it can be combined with a gas furnace for increased energy efficiency throughout the year.

TWO-STAGE COMPRESSOR OPERATION

With its two-stage design, the 4SHPI8LS makes the distinction between mild and extremely hot or cold days, using only the energy necessary to keep you comfortable.

EFFICIENCY

The **4SHPI8LS** has efficiency ratings of up to 18.00 SEER* and 9.20 HSPF*—significantly higher than standard single-stage heat pumps. That means you can save hundreds of dollars in energy costs, all without sacrificing an ideal home environment.

5-YEAR ENERGY SAVINGS***

Savings versus 10.00 SEER units
